

# DMV-8826FN Coating Thickness Gauge

- Measures non-magnetic coatings on **steel substrate** and non-conductive coatings on **non-ferrous substrate**.
- Clear LCD display with results displayed in microns or mils.
- Zero feature for accurate setting on uncoated sample.
- Supplied with separate F & N probes.
- Automatic substrate recognition.
- Auto switch off.
- Low battery indicator.
- Standard delivery includes batteries, calibration foils & storage case.

<b>Range</b>	0 ~ 1250 $\mu\text{m}$ / 0 ~ 50 mil
<b>Accuracy</b>	$\pm 1\text{-}3\%$ or $\pm 2.5 \mu\text{m}$
<b>Resolution</b>	0.1 / 1.0
<b>Power source</b>	4 x 1.5v AAA batteries
<b>Dimensions</b>	126 x 65 x 27mm
<b>Weight</b>	81g
