

Time Temperature Integrator +3°C

Seafood

Cold chain monitoring of seafood products

Non-contractual photo

Part nr. 11328

Presentation

Especially designed for cold chain monitoring of seafood products, the Time Temperature Integrator records the cumulative time during which your product was exposed **above 3°C**. The adhesive label allows an application directly on the packaging.

Completely inert until activation, the Time Temperature Integrator is easy to start by pressing the activation button. This activation is indicated by a color change of the button from clear to colored circles.

As long as the monitored product is kept below 3°C, there is no colored indication in the second window.

If this temperature is reached or exceeded during 2hrs, the second window colors in blue; during 4 hrs, the third window colors too.

The Time Temperature Integrator allows a rapid and reliable on-site quality decisions, without the use of software or other equipment.

Benefits

- Accurate and irreversible
- Easy to read and clear color indicator
- Rapid decision making
- Economic
- Storage and transport without constraints
- Does not contain toxic reagents

Technical features

Temperature	+3°C
Accuracy	+/- 1°C
Reading	Direct by color migration
Shelf Life	2 years
Start mode	Manual activation
Installation mode	Adhesive system
Storage conditions	Ambient temperature
Size	40 x 19 mm
Packaging	100 pieces
Delivered with	Compliance certificate
